Is the Cloud Making Physical Offices Obsolete?

November 9, 2012 | [Email and Collaboration](#)

g+1 Like **0**

Study after study has indicated that in as little as 10 years [cloud hosting](#) will have killed off the traditional office. Cloud computing allows employees to work from anywhere in the world, including at home, in a coffee shop or in a hotel room.

Office space is one of the greatest overheads for any business. Yet [business travel has radically increased](#) over the years, meaning that fewer and fewer employees are actually in the office to occupy those desks and chairs. Plus, more and more employees are enjoying the freedom of working from home, giving them flexibility from the traditional office space and hours.

Cloud hosting eliminates the need to have a physical office...to an extent. Many managers still want to see their employees in the office on a regular basis. Some it's just for the comfort to know that their employees are actually working. Others see the office as a place for interaction and creativity.

Further, some employees are just not designed to work remotely. They get easily distracted by everyday life, or they miss working with other people, causing many to set up office share programs with other remote workers.

While cloud computing may change the culture of the traditional office, it's truly unlikely to do away with it completely.

Interested in a virtual office? Trying [savvisdirect's cloud computing offerings](#) is the easiest way to see if a virtual office will work for you. Use our BETA50OFF code for a 50% discount on certain current offerings.

Are you considering making the transition to a virtual office? What do you see as the advantages and disadvantages?
